

NEW YORK CHIROPRACTIC COLLEGE

The New York Chiropractic College is currently accepting applications from candidates for the Master of Science in Diagnostic Imaging (MSDI) program. The residency program is devoted to the discipline of chiropractic radiology and includes academic, clinical, and scholarly components. The program leads to a Master of Science degree in Diagnostic Imaging and qualifies successful candidates to sit for the examinations leading to the professional certification “Diplomate of the American Chiropractic Board of Radiology” (D.A.C.B.R.)

The program is rigorous and residents are selected on a competitive basis for limited openings. Applicants are chosen based upon a written examination, oral practical examinations, and an interview with the residency selection committee. Resident duties include teaching in laboratories and lectures of various radiology courses, didactic and film interpretation tutorial sessions, clinical rotations in outpatient clinics, and rotations through outside imaging centers. Additionally, residents are responsible for the design and completion of a master’s thesis.

Residents are paid a competitive salary, are eligible to participate in NYCC's benefits package, and also may qualify for postdoctoral grants with certain funding agencies.

Interested individuals should contact the Director of the MSDI program for an application:

Jean-Nicolas Poirier, D.C., D.A.C.B.R.
